Form 2

OVAC: _____ Owner: _____

Farm address: _____

1. I, _____, the owner of the ram flock at the above address, and for which herd an application for accreditation has been lodged with the Department of Primary Industries and Regional Development, certify that all rams over the age of six months have been presented for clinical examination and the collection of blood samples on / / (date).

Owner signature: _____

2. I, _____, a registered veterinary surgeon, certify that I have clinically examined all rams* (see footnote below) presented on / / (date) by _____ (owner) at _____ (location)

and that all blood samples for Ovine Brucellosis testing are individually identified as required.

Tick appropriate boxes:

- No clinical cases of epididymitis are present in the herd.
- Clinical cases are indicated in the 'comments' column on the laboratory continuation sheet submitted with the blood samples.

This test is for:

- Initial accreditation – 1st test
- Initial accreditation - 2nd test
- Re-accreditation
- Part flock
- Whole flock
- Introductions
- Other

Registered veterinarian signature: _____

Accreditation - all rams >10months of age and any rams 6-10 months of age with palpable testicular abnormalities, and for **Reaccreditation** - all rams >10 months of age - NB. a sample of the sale rams 10-12 months of age is acceptable (see 2.2.4 of Guidelines for the minimum number of sale rams that need to be tested).

Ovine Brucellosis Accreditation Scheme Testing Form 3

DPIRD Diagnostic Laboratory Services (DDL S)

3 Baron-Hay Court,
South Perth, WA, 6151

Name: _____

OVAC: _____

PIC: _____

This test is for:

- Initial accreditation – 1st test
- Initial accreditation - 2nd test
- Re-accreditation
- Introductions - 1st test
- Introductions - 2nd test
- Other _____

A minimum of 4ml of whole blood should be collected into 5ml or 10ml plastic screw cap serum tubes or Vacutainers that are tested for serum separation. The use of the correct tube is essential to promote clot reaction and avoid haemolysis. Tubes containing lithium heparin or EDTA anticoagulants are unsuitable. Plasma is not suitable for complement fixation tests.

For more details consult the DPIRD Diagnostic Laboratory Service Manual.
